COMPREHENSIVE SOLUTIONS
FOR YOUR INTUBATION NEEDS

An ISO 13485:2016 & US-FDA Audited Co.

INTEGRATED MACINTOSH / MILLER

- Completely sealed ONE PIECE BLADE CONSTRUCTION, Maintenance Free design
- Smooth shape – no sharp edges or cavities, very easy to clean and disinfect
- Distal lip of all Integrated F.O. blades feature special non-traumatic profile
- Shortened shoulder of blades improve the anesthetist's view to epiglottis & vocal cords
- Fiber optic bundle of 4mm & 6000 individual micro-fibers for best in class light transmission
- All blades made of premium grade stainless steel in matt finish
- Both ends of large fiber bundle are protected – for long life of blades
- Tested to withstand 4000 standard Autoclave cycles of 134° C / 3 minutes
- Blades are also compatible with Sterrad® and other low-temperature gas plasma sterilization procedures
- No flickering or low light issues – due to lamp located inside protected handles harness
- No tricky opening or crevices to get dirty – a major contribution to eliminating cross infection
- Blades supplied individually or in sets with suitable long life foam padded carry cases
- ISO 7376:2020 compliant, CE marked & fit onto other ISO laryngoscope handles
- Integrated F.O. Blades available in Curved Macintosh 0,1,2,3,4,5 and Straight Miller 00,0,1,2,3,4 sizes

INTEGRATED – ADULT LARYNGOSCOPE SET

FLEXION MACINTOSH

- The FLEXION is a Macintosh F.O. Laryngoscope blade with a tip which is adjustable through 70°. A lever controls the tip angle during intubation to lift the epiglottis, giving a clear view of the vocal cords. Contact with the upper row of teeth and unnecessary pressure on the tongue and soft tissue are avoided
- Both ends of large fiber bundle are protected – for long life of blades
- Fiber optic bundle 4mm & 6000 individual micro fibers for best in class light transmission
- Integrated fiber optic design – for best in class maintenance free performance
- Fits all ISO F.O. handles (green standard). Exception: F.O. Angled handles
- All blades made of premium grade stainless steel in matt finish
- Tested to withstand 4000 standard Autoclave cycles of 134°C / 3 minutes
- Blades are also compatible with Sterrad® and other low-temperature gas plasma sterilization procedures
- Blades supplied individually or in sets with suitable long life foam padded carry cases
- ISO-7376:2020 compliant, CE marked & fit onto other ISO laryngoscope handles
- Blades available in three most common curved Mac 2,3 & 4 sizes

PRODUCT	Order Ref. No.
MAC – 3,4 + Hyper LED Medium Handle in plastic case	SM.3298-6
